

# Lookout for Remote Work: Security that works everywhere you go

We're living in a new normal and security has changed. In an unprecedented time where society has had to change due to the COVID-19 pandemic, countries went on lockdown, forcing enterprises to change how they operate in a matter of days. To keep any negative impact to business operations to a minimum, the vast majority have required employees to work from home.

This rapid digital transformation means that your organization's protective perimeters are no longer in place, leaving your employees vulnerable to cyberthreats more than ever. Empower your mobile workforce and maximize secure productivity.

To fully leverage the productive potential of a remote workforce, download this brochure to learn:

- How the security landscape has changed
- Reference Architecture: Risk-Based Vulnerability Management
- How to establish a security baseline for mobile
- What are the solutions to secure your remote workforce
