

# **Modernize Your Analytics and AI with Cloudera Data Platform**

The most innovative companies use data to transform their organizations. However, businesses are challenged by siloed analytic workloads, data in data centers, public clouds, and at the Edge, and onerous controls that limit business productivity and increase costs. Organisations need a new approach. An enterprise data cloud is a new approach to data that allows you to serve customers better, operate with greater efficiency, and strengthen security to protect your business.
