GigaOm Radar for Evaluating Machine Learning Operations (MLOps) v1.0

Vendor Assessment for Technology Decision Makers

Machine Learning, ML Ops

The time for performing production machine learning (ML) on an ad hoc basis is over. MLOps – the management of experimentation, deployment, and monitoring of ML models in a formalized, consistent, governable, and rigorous manner – is now essential. Read this GigaOm report for an in-depth analysis of MLOps vendor solutions and discover the capabilities and features that make Cloudera an MLOps leader.
