GigaOm Radar for Cloud Observability v1.0

ANDY THURAI | FEB 26, 2021 - 10:57 AM CST

TOPIC: CLOUD INFRASTRUCTURE

In its first year, the GigaOm report evaluated vendors and products in the observability space.

According to the report, Splunk earned its 'Outperformer' ranking on the list for "massive scalability, sophisticated in-stream analytics and native OpenTelemetry support."

Read GigaOm Radar for Cloud Observability, 2021 and discover how an observability solution can help you:

- Achieve higher application uptime
- Provide better user experiences
- Empower more productive engineering teams
