

Get Your Cloud & Hybrid Migration Strategy Right in Government

Cloud migration still offers its fair share of speed bumps along the way. And while U.S. Federal Risk and Authorization Management Program (FedRAMP) authorized secure cloud-based services are available to help accelerate modernization efforts, only 21% of IT decision makers have enough confidence in their ability to manage the scale and complexity of IT modernization initiatives.

Government IT management teams have to keep pace even as digital business infrastructures become more complex with new cloud assets and networked devices. Security teams must ensure their organization's posture is secure even

while releasing control over some key technology. And business teams must continue to predict and manage costs amid all this change. But there are ways to navigate the process effectively.

To make your cloud migration journey successful in government, register for your complimentary copy of the e-book *Get Your Cloud & Hybrid Migration Strategy Right in Government*. You'll learn:

- How to make the transition to the cloud as seamless as possible
- Why you need full visibility into your infrastructure before, during and after migration
- How IT, security and operations teams can maximize the ROI from moving to the cloud
