

2023 Gartner® Market Guide for Network Detection and Response

The screenshot shows the Gartner report page for the 2023 Market Guide for Network Detection and Response. The page includes the Gartner logo, a navigation bar with 'Gartner' and 'Licensed for Distribution', and a header with 'INTERNAL USE ONLY'. The main content area features the report title, publication date (14 December 2022), and author information (Jeremy D'Horris, Nat Smith, and 1 more). A summary paragraph states: 'The network detection and response market grows steadily and expands to new use cases, such as Iaas. Security and risk management leaders should prioritize NDR as complementary to other detection tools, focusing on low false positive rates and detection of anomalies that other controls don't cover.' Below this are sections for 'Overview', 'Key Findings', and 'Recommendations'. The 'Key Findings' section lists three points: 1) The NDR market continues to grow steadily at 22.5% per the latest Gartner security forecast, despite increased competition from other platforms. 2) As early adopters enter a renewal phase, incident response and orchestration workflows gain more weight during the evaluation. 3) A handful of NDR vendors capture most of the attention in the market. Organizations with specialized detection use cases would benefit from rising known vendors with emerging local players in their shortlists. The 'Recommendations' section lists three points: 1) To develop their network detection and response capabilities, security and risk management leaders should: 2) Complement existing detection solutions by implementing NDR tools to detect abnormal behavior and provide investigation capabilities for postbreach activity. 3) Identify gaps in current detection and response practices to determine if the anomalies that NDR can

In the 2023 Gartner® Market Guide for Network Detection and Response, Cisco is listed as a Representative Vendor. A Market Guide defines a market and explains what clients can expect it to do in the short term. With the focus on early, more chaotic markets, a Market Guide does not rate or position vendors within the market, but rather more commonly outlines attributes of representative vendors that are providing offerings in the market to give further insight into the market itself. If you're trying to figure out how a new market might fit in with your company's present and future technological needs, we believe the Gartner Market Guide reports are a great place to start.
