2024 Connectivity Benchmark Report

MuleSoft's 10th annual Connectivity Benchmark Report, in collaboration with Vanson Bourne and Deloitte Digital, was produced from interviews with 1,050 IT leaders across the globe.

Respondents are all IT leaders in a managerial position or above in an IT department. All respondents work at an enterprise organization in the public or private sector with at least 1,000 employees.

Download the 2024 Connectivity Benchmark Report to discover:

- How AI has caused the nature of digital transformation to shift
- How successful AI implementation is dependent on integration
- What automation can do to power innovation across the organization
- How APIs continue to drive revenue and increase productivity
