

Frost & Sullivan Frost Radar: Cloud Workload Protection Platforms, 2023

With organizations' increased cloud adoption, Cloud-native application protection platforms (CNAPPs) have also been on the rise to protect cloud resources more efficiently and with a consolidated toolset. In this report, Frost & Sullivan covers why CNAPP has been on the rise, how it enables tool consolidation, and key criteria to consider during your evaluation. Frost & Sullivan recognizes Wiz as a leader in the market as well as the fastest-growing player.
