

## xsiam-gigaom-radar-report-2023

In the ever-evolving realm of cybersecurity, groundbreaking advancements have arrived. On the one hand, AI and automation have empowered organizations to achieve faster, more efficient threat resolution, safeguarding our digital landscape. On the other hand, threat actors are harnessing these same technologies to amplify their attacks.

In this dynamic landscape, ensuring the utmost security for your organization is paramount. The question isn't whether to embrace AI and automation, but rather how to stay ahead of the curve by choosing the most advanced and comprehensive solution.

We're proud to announce that our revolutionary AI-driven platform has been recognized as a leader in the GigaOm Radar on Autonomous Security Operations Center (SOC) solutions. But that's not all. We've also been recognized as an outperformer, setting the bar high in both strategy and innovation.

GigaOm evaluated a number of vendors on their autonomous SOC solutions, measuring them against their ability to serve specific market segments, the deployment options of their solution and other key criteria for product capabilities and innovation.

Report highlights include:

- **Market Segments:** Assesses how well the solution serves specific market segments (SMBs, large enterprises, MSSPs).
- **Deployment Models:** Evaluates available deployment options (physical appliance, virtual appliance, cloud, SaaS).
- **Key Criteria Evaluation:** Measures the solution's performance against criteria, including differentiated features, nonfunctional metrics affecting purchase decisions and utilization of emerging technologies expected to become mainstream in 12–18 months.

Transform security operations with Cortex XSIAM® today and take your security to the next level.
